Faculty Publications
2004

The Loyola/Notre Dame Library is proud to recognize the faculties of College of Notre Dame of Maryland and Loyola College in Maryland for their scholarly achievement through their outstanding publishing efforts.

Eighty-three faculty members at the two colleges produced scholarly works in the calendar year 2004. The calendar year has been chosen as the term for consideration of inclusion due to the publication sequence of journals. The bibliography is organized alphabetically by college and then by department. Publications considered for inclusion are books authored or edited, book chapters, journal articles or published conference proceedings. Book Reviews, letters to the editor, and unpublished papers have not been included. The library has made every effort to include each professor that has published in the last year, relying on notices provided by the faculty themselves, lists from department chairs, deans and the academic vice president and from searching online databases.

This list will be compiled and published annually.
